SOLUTIONS

OUR **EXPERTISE**

ITS CORE EXPERTISE IS IN THE FIELD OF ELECTROMAGNETIC RADIATION MEASUREMENT (EMITTED FROM MOBILE TOWERS) AND RADIATION SHIELDING SOLUTIONS. ELECTROMAGNETIC RADIATION COMES FROM ALL THE ELECTRICAL AND ELECTRONIC APPLIANCES, FM AND TV TOWERS, MOBILE PHONES A MOBILE PHONES TOWERS, WI-FI ROUTERS SOLAR PANEL OR HYDRO ELECTRICITY ETC.

WHAT IS **RADIATION** AND HOW IS IT **AFFECTING US ?**

RADIATION IS ENERGY THAT COMES FROM A SOURCE AND TRAVELS THROUGH SPACE AND MAY BE ABLE TO PENETRATE VARIOUS MATERIALS.

BROADLY SPEAKING, RADIATION IS A WAY IN WHICH ENERGY MOVES FROM ONE PLACE TO ANOTHER.

RADIATION IS CATEGORIZED AS IONIZING & NON-IONIZING

WHO **EMF** CONTROL CAMPAIGN

CONTROL
REDUCE EMF
USAGE

The poster for the WHO EMF Project features a dark background with a blue and green abstract pattern. At the top left is the WHO logo and the text "World Health Organization". The main title "The International EMF Project" is in large, bold, yellow and orange letters. Below it, in smaller white and yellow text, it says "investigates health effects of electromagnetic fields" and "advises national authorities on EMF radiation protection". The right side of the poster is divided into three horizontal sections: "STATIC" (top) with a photo of a red train, "INTERMEDIATE FREQUENCIES" (middle) with a photo of a person in a green protective suit, and "EXTREMELY LOW FREQUENCIES" (bottom) with a photo of a woman looking up. A vertical rainbow spectrum is on the right, with "NON-IONIZING" at the top and "IONIZING" at the bottom. A frequency scale from 0 Hz to 10¹⁴ Hz is at the bottom. The URL "www.who.int/emf/" is on the right edge.

investigates health effects of electromagnetic fields

advises national authorities on EMF radiation protection

THE SPECTRUM

People all over the world are exposed to electromagnetic fields (EMF) to varying degrees, and the levels of exposure will increase as technology advances further. These EMF are found in the non-ionizing part of the electromagnetic spectrum (between 0 and 300 GHz) and are emitted from common sources such as power lines and cellular phones. They are different to ionizing radiations, such as X-rays and gamma rays, which have enough energy to break molecular bonds.

Circuit Cut-off Switch ONF 3

The GEOVITAL mains switch ONF3 is the successor of the popular GEVITAL Vitalklick network switch. Just like the vital click, the ONF 3 is an electronic device that can be used to monitor
eangledc trifcraigl hcatebnle s.d Bisuttu trhbsein Og NF 3 is more
modern and more powerful

Circuit Cut-off Switch ONF 3

The easiest way to disconnect radiation-emitting walls

The Geovital circuit cut-off switch is an electronic device that can be used to monitor and disconnect disturbing electrical wiring. When installed in the fuse box, this device disables the electrical circuit after electricity usage on that circuit has stopped. This eliminates the associated radiation of the otherwise live circuit wiring. The nervous system is thereby no longer burdened by constant radiation exposure, especially during sleep.

IMPORTANT: Radiation assessment by a Geovital consultant is strongly recommended.

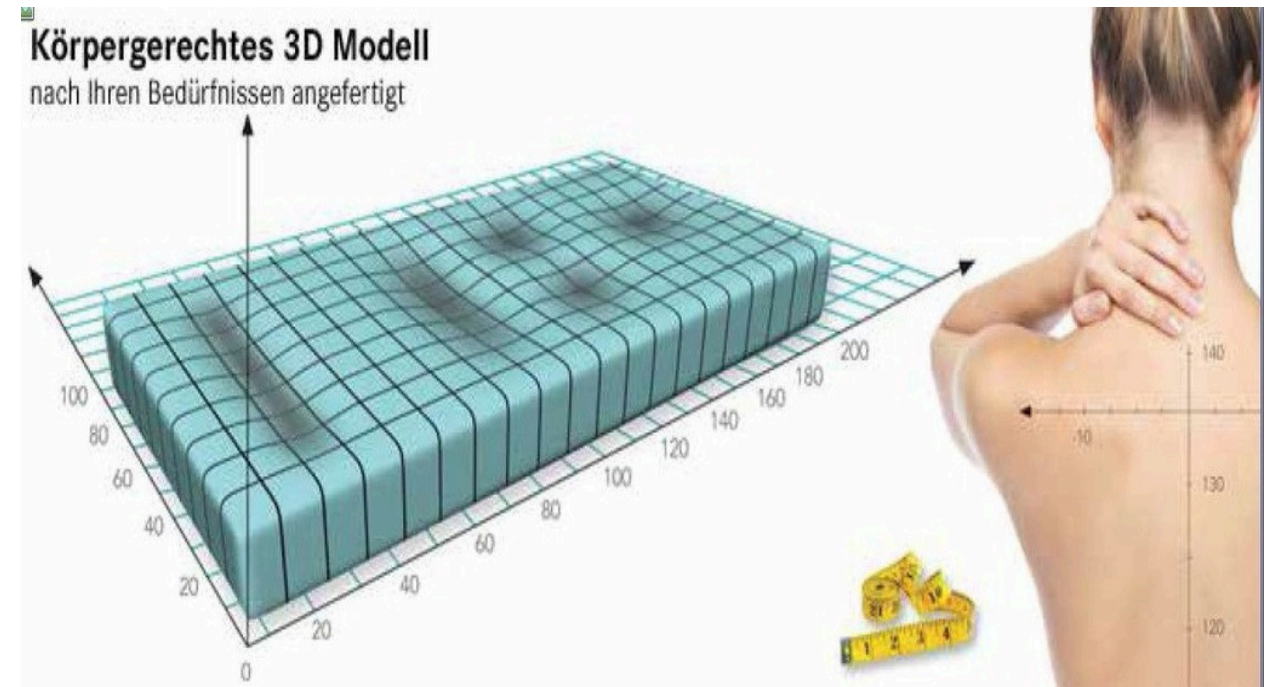

To correctly identify the circuits which need guarding by a circuit cut-off switch, a bedroom radiation assessment and measurement protocol is needed. Please realize the importance of this, as otherwise the installation of circuit cut-off switches may be done purely at random by your electrician. It is not the job of the electrician to measure or identify the burdening circuits and neither do they know how; that is the job of your Geovital Geobiologist. Devices installed in the fuse box should be installed by a qualified electrician; this may also be an insurance requirement.

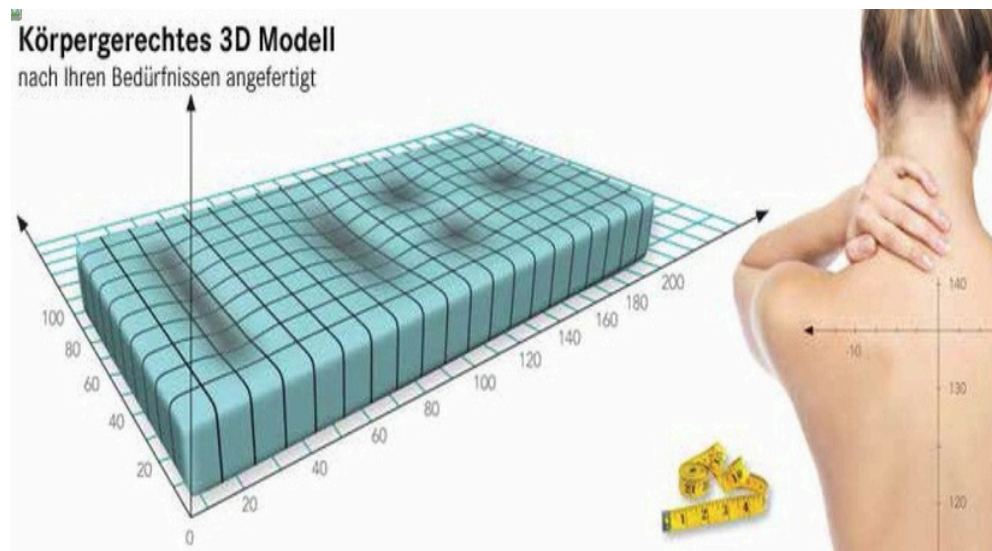

Application

- Suitable for bedrooms, playrooms and lighting circuits.
- Cut-off action is activated when the last electricity-using appliance or light on the circuit is turned off. (e.g. a bedside lamp).
- The switch functionality is verifiable with the supplied check light placed in a power point on the same circuit.
- Power is instantly restored to the entire circuit when any electrical device on that circuit is turned on.

Body-Shaped Combi Stretch Mattress

After the excellent results we have achieved with the stretch mattress for more than 30 years, we have decided to tackle a modified version of the stretch mattress for patients with shoulder problems, falling arms and hands, heel spurs and people with marked lumbar spine

This is how the Kombi stretch-effect works: The weight of the sleeper causes the slanted partitions to fold over. Consequently, there is a lengthening of the surface area (a stretching effect) towards the head and feet ends, generated in accordance with body weight. The objective is to bring the pressure in the spine into the negative with a **-0.8 to -1 kg traction**.

Based on Geovital's own research results, in most cases, a pain-free interval of about 48 hours is achieved; this is sufficient for normal everyday life.

After the outstanding results achieved with the Theravital stretch-effect mattress over the last twenty-five years, **Geovital decided to launch a variation of this successful mattress**. The aim was to provide more specialized support for patients suffering from shoulder problems, paresthesia (pins and needles) in hands and arms, heel spurs and Lumbar Spine Syndrome (lower back pain). The emphasis was on providing **the most individualized relief and support zones possible**. After three years of research and testing, Geovital successfully developed a template system and the cutting-edge technology which enabled the mattress core to be shaped, not only two-dimensional, but **three-dimensional**. Using this unique technology, each mattress is **manufactured by hand** to create a 'landscape' that fits the individual perfectly with shoulder and heel indentations, and built-in lumbar and spine support. Each patient or client receives **their own truly unique mattress** which is exactly right for them. The mattresses are made in Austria (Europe) with a gorgeous removable, washable cover, made from the highest quality material we can get from Tencel and are typically ready for shipping in one or two weeks. The results over the last seven years have amazed our health professionals. Here is an excerpt from our own statistics: **90% of patients with back issues are symptom free. 70% of patients with neurological deficits in the extremities found improvements. 30% of heart patients are symptom free, as pressure is taken off the heart meridian. 40% of patients no longer snore.**

Radiation Protection Mats

Protection against earth radiation (water veins, grids, warping, ...)

With the Geovital radiation protection the problem of natural disturbing zones of the geology (water veins, warping, grids) can be solved easily and fast. This has proved to be the efficient system in the last 35 years

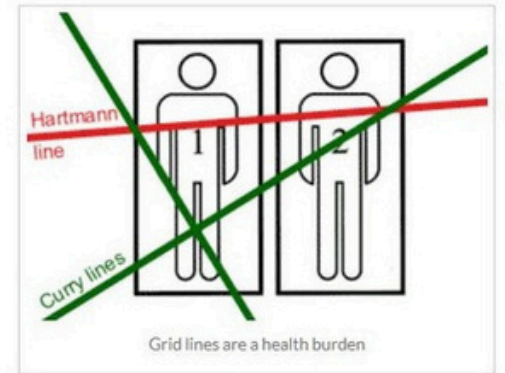

Protection against excesses of natural radiation – Geopathic Stress (water veins, fault lines, grid lines,)

With the Geovital 'geopathic stress' protection products the problem of natural health burdens (water veins, grid lines, tectonic disturbances...) is easily addressed. Our system has proven to be effective over the last 25 years.

Your protection starts with an assessment by a certified Geovital Geobiologist to determine which types of geopathic stress are present and their strengths. This information is documented and archived.

GEOVITAL does not offer geopathic stress solutions to clients without an assessment of the situation!

Shielding mats have a 3-month satisfaction guarantee, enabling mats to be trialled, and the mats can be returned if you don't think it helping you (conditions apply). There is a high satisfaction rating, with returns globally being only 2% annually and this is mainly in November and December.

Particulars of the Shielding mats

‘Therapie Pillow’ for the neck

After experiencing the stretch-effect mattresses, patients quickly asked if those benefits could also be applied to a pillow. Many had complaints regarding their cervical spine (neck), as well as accompanying tension. The specialised section of the pillow produces a **slight stretching** of the cervical spine.

A **removable insert** regulates the distance between the head and mattress. This enables each user to adjust the pillow so it is just right for them.

The image shows the pillow with its cover and without – clearly showing the foam core and the removable insert beneath. Imagine the person’s body extending to the left of the pillow, effectively placing the higher area of the pillow under the neck. This will cause the small panels to bend to the right (i.e. towards the head). **Material**

Material

One of the major points of difference between Geovital mattresses and pillows compared to other products produced by those with little in-depth knowledge of human health, is the materials used. Many foams and even natural alternatives cause **intolerance issues** which is why Geovital developed its own foam to address this. This makes our pillows a great complement to any mattress, but a necessity for users of our mattresses so as to completely eliminate exposure to the usual materials which, in our opinion, patients/clients should not be exposed to in the first place.

The Cover

Geovital pillow covers are special! They are made of a material called **TENCEL®**, which is suitable for people with skin and respiratory complaints, as tested by the University of Heidelberg in Germany. Made from cellulose fiber which feels great, is strong and is a renewable resource. It is also removable and washable!

You deserve a good pillow. Allow yourself to experience the Geovital difference!

GEOVITAL T98, the shielding paint for protection against HF electromagnetic radiation

T98 is an electroconductive primer for shielding and dissipation from electromagnetic radiation. With 2-fold brushing of a surface, the shielding effect with respect to high-frequency radiation with a screen attenuation is up to 50 dB. This corresponds to an HF shielding effect of 99.999%.

GEOVITAL T98, the shielding paint for protection against HF electromagnetic radiation

T98 is an electrically conductive primer for shielding against, and the leading away, of radiation. By applying two or three (5G is here now) coats on a surface, shielding effectiveness of 99.999% against high frequency radiation can be achieved. In technical language, this equates to a protective attenuation of up to 50dB, and this at frequencies of up to 10Ghz!!! Also showing exceptional performance to the highest level tested at the time, 20 Ghz! (You need performance at the higher frequencies where it matters most)

Radiofrequency (RF) Radiation / Microwaves / High Frequency

T98 shielding paint effectively functions as a mirror and bounces the RF radiation back. In our latest formula 15% of the RF is absorbed and so what is bounced back is less. The normal approach is to essentially create a box which provides protection from all sides and creates a much lower RF exposure inside.

Shielding 1 wall or an area that does not result in a 'box' should be carefully considered. Firstly other sources of radiation can be penetrating the room from unprotected sides and be reflected in the surfaces that are shielded and are likely to produce disappointing absorption levels of RF in the body. Secondly, with sides left open, a change in the outside environment (new phone towers going up) can change the exposure inside dramatically without you knowing. Therefore regular assessments and testing of the body absorption of RF should be planned for.

GPA shielding mesh provides effective protection against electronic pollution

GPA is a fibreglass mesh with metal woven through it that is coated in Geovital's electrically conductive T98 Alpha shielding paint.

GPA reduces electromagnetic high frequency (RF) radiation exposure in buildings from common sources like mobile phone towers, wi-fi, smart meters, cordless phones, radar, airport navigation systems, etc. It can also be used to shield against low frequency electric fields, often produced by internal wiring.

GPA can be applied on walls, ceilings and potentially, flooring:

- under timber cladding
- placed inside wall, ceiling and floor structures
- placed under carpet
- as reinforcement mesh in ETIC systems
- as reinforcement mesh in rendering

GPA provides effective shielding against electronic pollution. It can achieve a reduction of over 99% in the amount of high frequency (RF) radiation and reduces low-frequency electric fields dramatically (Tested by Prof. Pauli in the facility of the German Armed Forces, Munich). As well as being alkali resistant, it has high tensile strength.

Application

Low frequency (LF) and high Frequency (HF) shielding

- Internal and external application
- As reinforcement mesh in ETIC systems
- As reinforcement mesh in rendering
- Under timber cladding
- Placed inside wall, ceiling and floor structures
- Placed under carpet
- For safety reasons, all surfaces must be grounded on the ground wire of the electrical system or by contact on a stripped section of central heating pipe (EU regulation) by a qualified electrician. We strongly recommend a 'grounding strip' (metal strapping) for this purpose.

Therapy stretch mattress - Geovital mattresses electrically neutral

When roosting you will come across again and again on electrically conductive bedding materials. One of these disease makers are the currently popular box spring beds, which are nothing more than multi-layered spring mattresses. Even latex

oeincrcs sr eoa-csae an ldmle das sbiivoemlya
dtruaet zteon t hec amno isture these
electrosmog problems. However, one does
not want to sleep in an electric field all night,
which massively disturbs the nervous system.
GEOVITAL mattresses prevent this effect.

The GEOVITAL natural health stretch-effect mattress *does something!*

It's like having your own physiotherapist. During 8 hours of sleep, it is working on you and bring relief to the spine and intervertebral discs. The movement of the slanted panels increases the flow of air and oxygen to the body

Theravital is the mattress with amazing effectiveness

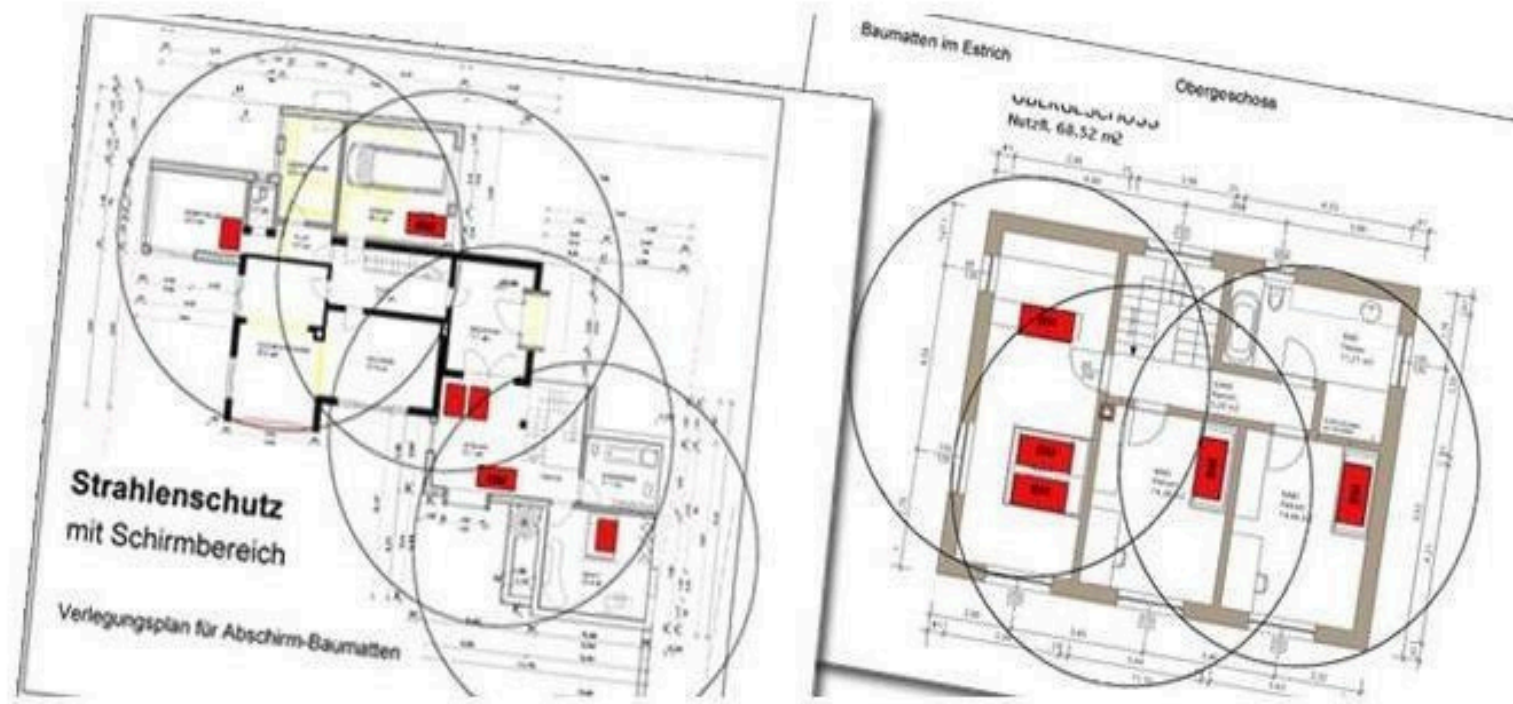

The problem of electrically conductive mattress materials was first brought to light in Geovital's research back in 1982. The effect of low and high frequency radiation was increased in most cases in mattresses made with metal spring systems, Latex, horse hair, memory foam, and silver threads as well as other materials.

The Academy was looking for suitable materials to recommend to patients so it carried out extensive testing in which more than 600 different mattress types were tested. To everyone's amazement there was no material in use that met the high standards of the Academy in terms of being anti-static, anti-allergenic, toxin-free, having low electrical conductivity and high air permeability.

Spurred on by these findings, new techniques were developed to obtain the desired and appropriate core material. This was later enhanced by the participation of orthopaedic surgeons in development of the stretch-effect feature – a simple mechanical action with the aim of providing relief to those patients who struggle with joint and back pain. A simple mechanical action would convert the pressure on the nerve tissue into a relief bringing traction. For the removable, washable cover, we use Tencel.

Research done in 1988, 1990 and 1991 showed a surprisingly high satisfaction rate in improvement of joint and in back pain symptoms.

Construction mats – built into flooring

Radiation shielding construction mats – protect the entire home

EXPERT REPORT

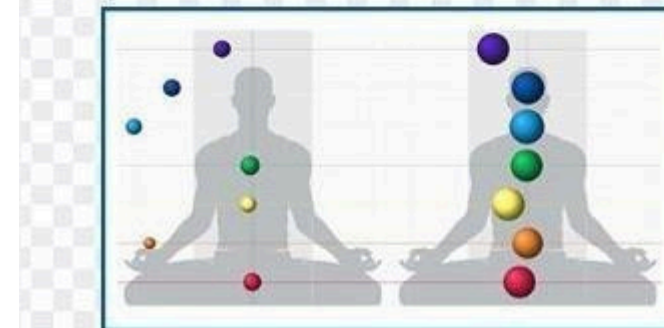

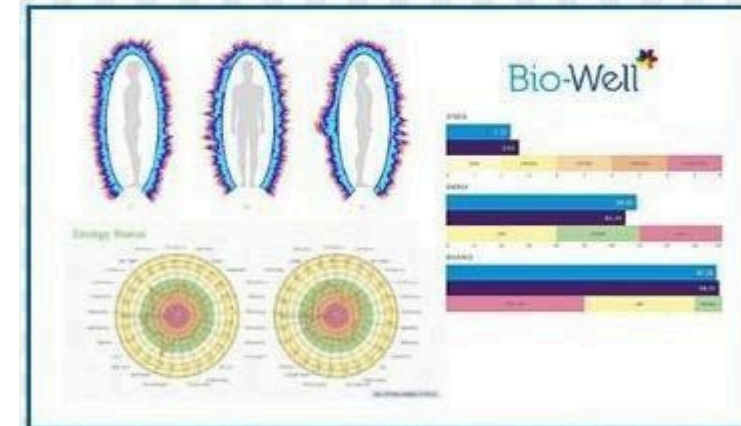

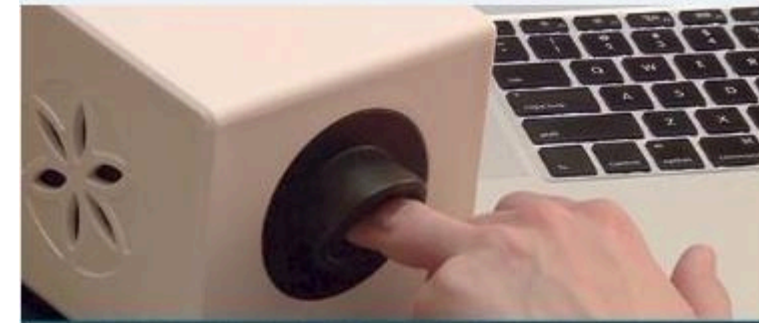

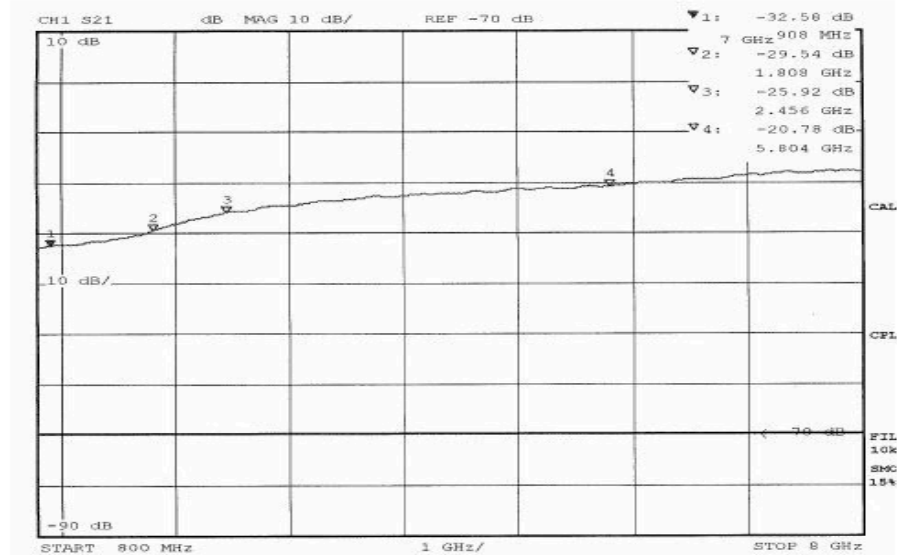

Ordered by: GEOVITAL
Akademie für Geobiologie und Strahlenschutz
Unterwölbühl 430
A-6934 Sulzberg

Device under Test: GEOVITAL GPA – Shielding Fabric

Subject: Measuring the shielding efficiency against electromagnetic waves from 100 MHz to 20 GHz

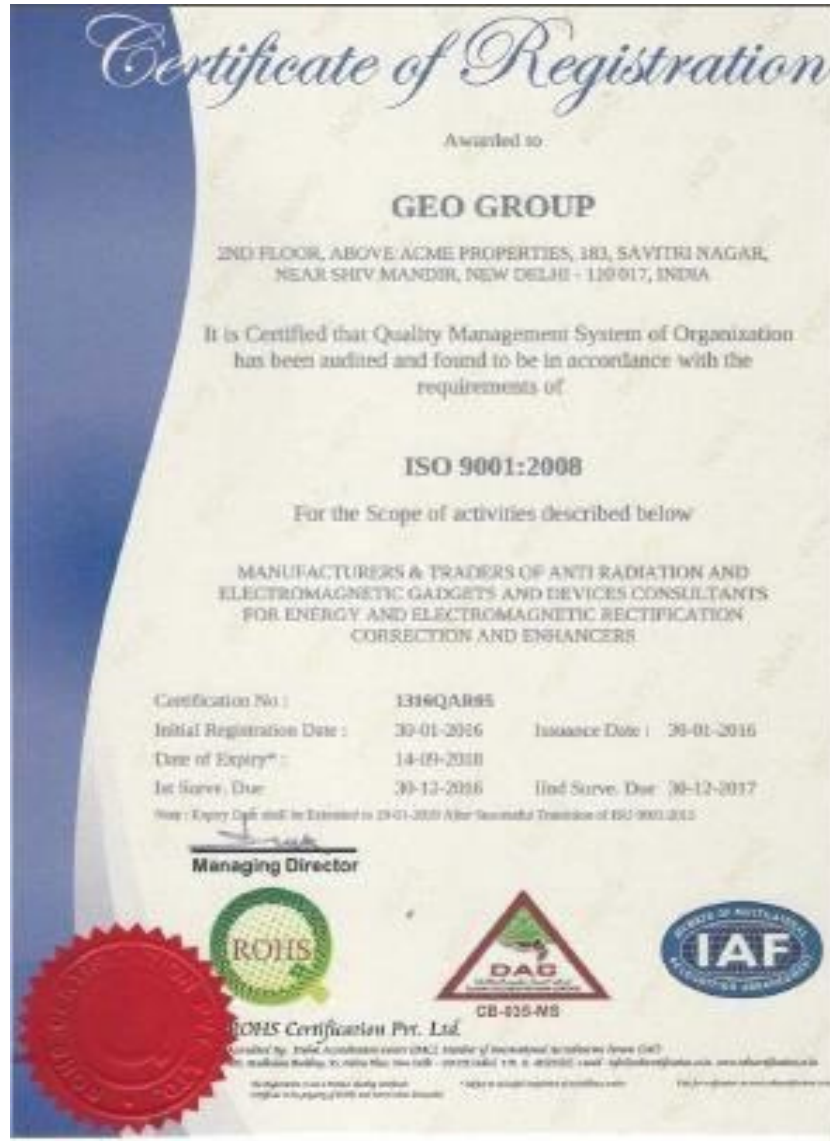

Regulations: IEEE 299-1997 and ASTM D-4935-89
(ASTM = American Society of Testing and Materials)

Date of Measurements: 18th of March 2010

Certification

UKcert
Certification & Inspection

Certificate of Compliance

RoHS Directive (2002/95/EC) of the European Parliament and of the Council on the restriction of use of certain Hazardous Substances in Electrical and Electronic Equipments.

Certificate No. : UQ-4636

Manufacturer
Name : GEO GROUP
Address : 2nd Floor, Above Acme Properties, 183 Savitri Nagar,
Near Shiv Mandir, New Delhi-110017
Product : All Anti-Radiation and Electromagnetic Energy
Products & Devices.
Models : AIKYA, EASE, SANTIA, HUTA, GEO-ENGINEERS

This is to state that the above mentioned product is in compliance with RoHS Directive (2002/95/EC) of the European Parliament and Commission Decision 2005/618/EC on the restriction of use of certain Hazardous Substances (Lead (Pb), Mercury (Hg), Cadmium (Cd), Hexavalent Chromium (Cr⁶⁺), Polybrominated biphenyls (PBBs) and Polybrominated Diphenyl ethers (PBDEs)) in Electrical and Electronic Equipments.

Statement:
This certificate declares that the product type / model described above complies with the mentioned above European Standard(s).

Remarks:
This certificate of compliance is based on the evaluation of a sample of the above mentioned products. It does not imply and assessment of the mass-production of the product. This certificate holder may use this certificate in connection with the test report. The certification body should be informed (revision of technical file) for any modification or alterations made to the aforementioned product type(s), including design and manufacture and for extension to the existing scope of application.

The certificate is valid for three years if the company applies the technical construction file which has been stored in UKCert office. This certificate includes declaration of manufacturer. Certificate remains property of UKCert (UK Certification and Inspection Ltd.) to whom it must be returned upon request. The certificate validity is conditioned by positive results or surveillance audits.

Validity of this certificate can be verified at www.ukcertifications.co.uk/verify

Date of initial registration	04 th February 2016
Date of this certificate	04 th February 2016

Certificate of Compliance

CE

We hereby declare that the technical file of product complied with the requirement of directive 2014/53/EU Electromagnetic Compatibility.

Certificate No. : CE-2058

Manufacturer
Name : GEO GROUP
Address : 2nd Floor, Above Acme Properties, 183 Savitri Nagar,
Near Shiv Mandir, New Delhi-110017, India
Products Name : All Anti-Radiation and Electromagnetic Energy
Products & Devices.
Model / Brand : AIKYA, EASE, SANTIA, HUTA, GEO-ENGINEERS.

The Certification body has performed an audit of the above product quality system covering the design, manufacture and final inspection of the certified product. The quality system has been assessed, approved and is subject to continuous surveillance according to Directive 2014/53/EU Electromagnetic Compatibility.

This certificate is issued under the following conditions:

1. It applies only to the quality system maintained in the manufacture of above referenced models and it does not substitute the design or type-examination procedures, if requested.
2. The certificate remains valid until the manufacturing conditions or the quality systems are changed.
3. The certificate validity is conditioned by positive results or surveillance audits.
4. The CE mark as shown above can be used, under the responsibility of the manufacturer, after completion of an EC Declaration of conformity and compliance with all relevant EC Directives. The statement is based on a single evaluation of one sample of above mentioned product. It does not imply an assessment of the whole production.

Validity of this certificate can be verified at www.ukcertifications.co.uk/verify
